Game theory and fisheries

Lone Grønbaek ^a, Marko Lindroos ^b, Gordon Munro ^c, Pedro Pintassilgo ^d [Show more](#)<https://doi.org/10.1016/j.fishres.2017.11.027>[Get rights and content](#)

Abstract

Game theory studies the strategic interactions between and among decision makers, players, through mathematical models called games. This paper presents an overview on the evolution of the application of game theory to fisheries economics. The first applications emerged in the late 1970s.

How do I use the new advanced search?

Last updated on 24/07/2018 01:46 PM

▶ Performing an advanced search tutorial

The new advanced search form offers an open design which allows you to specify one or more pieces of information (e.g., keywords, authors, dates, etc.) to find related documents in ScienceDirect. You can easily build an explicit query using multiple Boolean operators and nested clauses in your search.

None of the available fields are mandatory to an advanced search query. You are simply required to complete at least one field with searchable information.
